

Nadav Julius

SUMMARY

Fullstack Web Developer specializing in advanced frameworks such as React, VueJS, Angular, NodeJS & MongoDB.
I'm looking for a company where I can launch my budding development career. Excited about the challenges it will bring as I continue to explore my passion for technology.

EDUCATION

Coding Academy, Ramat Gan, Israel

January 2020 - April 2020

An intensive coding bootcamp (640 hours) that qualifies Front-End developers. I learned everything from JS Vanilla to the three core frameworks used today and more. We covered server-side as well including basic APIs/REST with NodeJS and PHP.

All work is available for code review upon request. This link is to a few of my highlighted projects

EXPERIENCE

Self Employed, USA

March 2019 - December 2019

I spent the 6 months leading up to my taking part in Coding Academy working as a Motivational Sales Trainer. Based out of Charlotte, NC I traveled across the US building teams and giving reps real life skills - in organization and mental processes - that go beyond work.

Infinite Beauty, NYC, NY — *freelance*

March 2016 - March 2019

Throughout my time in Infinite beauty I climbed the corporate sales ladder. Starting out as a sales rep moving through logistical training and team building. Finishing my time there as a sales manager & area logistical coordinator.

Premium66, Jerusalem, Israel

January 2015 - March 2016

I joined Premium66 in its infancy and wore many hats throughout my time there. My main responsibilities fell under the category of 'Project Management', recruiting and supervising the growth of creative and sales teams alike. As the company grew I worked hand in hand with the marketing team strategizing SEO campaigns and more.

Address: הנרקיסים 11, עתלית

Tel: 053 7375 880
